Windows Server 2022: Con GUI

Configuramos una nueva máquina virtual con los mismos requisitos, montamos la imagen iso de Windows Server 2022 y seguimos los pasos anteriores, pero esta vez escogeremos la versión estándar con experiencia de escritorio

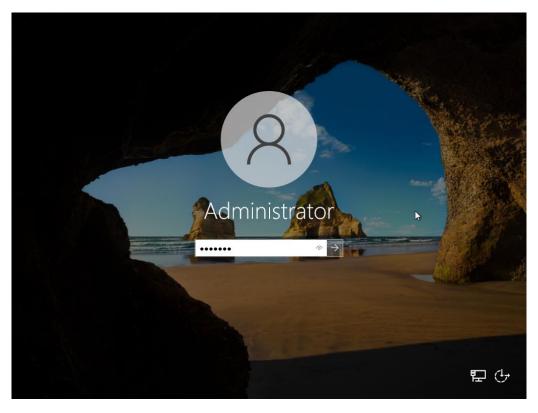

Procedemos con el proceso de instalación igual que anteriormente lo hicimos, y añadimos una contraseña de administrador; luego esperamos a que inicie el sistema

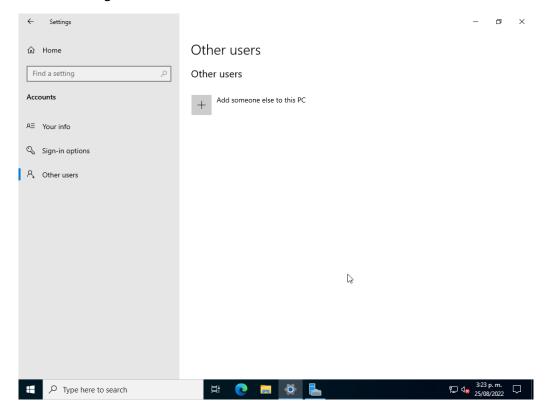

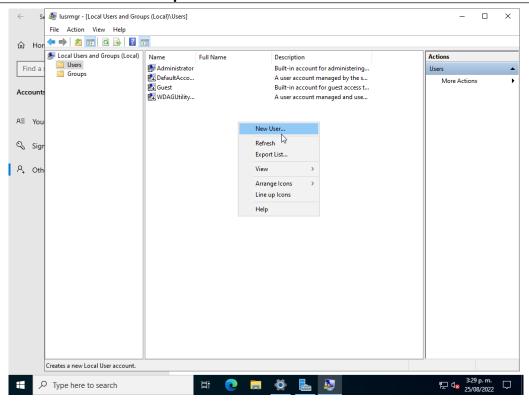

Iniciamos sesión como administrador

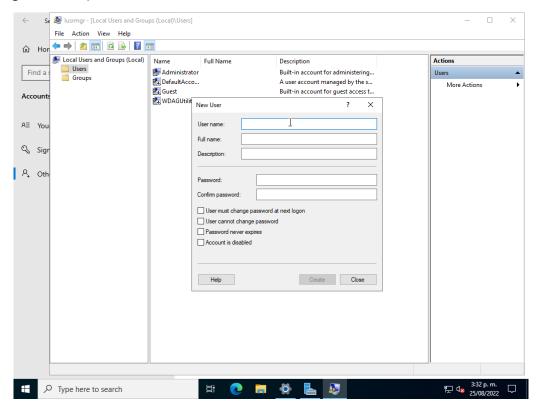

Creamos 3 usuarios en Settings > Accounts > Other Users > Add someone else to this PC

Añadimos configuraciones para el usuario

Finalmente tendremos 3 nuevos usuarios
